BILSTEIN B8 8112/8100 BLACK HAWK

BILSTEIN B8 8112 Black Hawk 3-Way adjustable coilovers and BILSTEIN B8 8100 Black Hawk 3-Way adjustable shock absorbers are direct fit, feature packed solutions for trucks and SUVs. The large 2.65" OD Aluminum shock body, paired with a unique finned remote reservoir, offers ZoneControl® position sensitive damping in both compression and rebound. Plus, 3 external damping adjustments for high/low speed compression and the internal bump stop provides a wide range of damping option. The ZoneControl® offers a significant advantage by virtually eliminating hard bottoming and keeping the ride buttery smooth over the small stuff. Whether you're driving rugged trails or paved roads, fully loaded or unloaded, the B8 8112 Black Hawk and B8 8100 Black Hawk offer the "best in class" ride experience.

FEATURES & BENEFITS:

- ZoneControl® CR: Dual Speed Adjustable Compression (C) with adjustable JCO: Provides superior bottom out control through a 2-stage, telescoping internal compression stop. This feature eliminates the need for an external hydraulic bump stop and can be tailored to your individual preferences
- Rebound (R): Secondary rebound stop will dissipate spring energy and stabilize the suspension directly following a large compression event. The internal rebound stop will also eliminate harsh top-out events and the need for an external limit strap
- Triple piston design delivers comfort during every day driving conditions and maximum control under large suspension inputs
- Click adjuster knobs allow easy and precise Dual Speed Adjustment of both low and high-speed compression plus an adjustable JCO (internal hydraulic bump stop)
- Aluminum finned 60mm ID reservoir for increased oil capacity and cooling
- Aerospace quality components are vehicle specific to optimize wheel travel and clearance
- All aluminum design with Type III Hard Anodized finish
- Owner rebuildable and revalvable
- Made in the USA
- Limited 2-year warranty

B8 8112 BLACK HAWK COILOVER FEATURES:

- Coilover supplied as a complete module for easy installation. Spring is pre-loaded to the recommended ride height
- Adjustable threaded spring seat allows for fine-tuned ride height. Adjustable range 1-3" depending on model
- Heavy duty, hard chrome heim joint mounting with rubber sealed misalignment spacers offer the most durable, load bearing mount solution

B8 8100 BLACK HAWK SHOCK FEATURES:

- Integrated debris shield protects piston rod from rock damage
- OE quality vulcanized bushings for durable direct fit mounting
