

Wrangler JL Unlimited 1.5" B8 5100 Lift Kit by BILSTEIN.

This is complete suspension system that will provide a significant improvement in performance, wheel travel, and articulation. The system utilizes longer travel cold wound springs which directly increases overall droop travel. The kit includes longer travel Bilstein B8 5100 monotube shocks and sway bar links to allow the suspension to achieve the full range of motion. The B8 5100 1.5" Lift Kit will maintain proper suspension geometry without the need for additional aftermarket components. This means your Jeep will gain a superior level of performance with minimal modification.

The B8 5100 1.5" Lift Kit will allow Rubicon models to fit 35" tires on stock or aftermarket wheels, and non-Rubicon models to fit 33" on aftermarket wheels.

Features & Benefits:

- Long Travel Cold Wound Springs for increased wheel travel and articulation
- Bilstein 5100 Monotube Shocks will enhance extended droop travel and provide a comfortable ride
- OEM Quality Extended Sway Bar Links allow for full range of suspension motion
- Billet Bump Stops to allow for larger tires
- Rear Sway Bar Drop Brackets for Rubicon models, will allow running 35" tires on stock wheels
- Front Spring Isolator provides for proper spring alignment
- Detailed Instructions for ease of installation

SUSPENSION OPTIMIZATION.
